GP

GP

Pre-school (1 - 4 years)

- Pneumococcal (given at 12-13 months)
- Meningitis B (given at 12-13 months)
- Measles / Mumps / Rubella / Varicella (MMRV given at 12-13 months and again either at 18 months OR at 3 years, 4 months dependent on your child's date of birth)
- Diphtheria / Tetanus / Pertussis / Polio (given at 18 months and / or 3 years, 4 months dependent on your child's date of birth)
- Flu (nasal spray - given to 2 & 3 year olds and those with certain medical conditions - ask your GP)
- For any vaccines that use porcine gelatine as a stabiliser; there are porcine-free alternatives - please speak to your GP.

School*

School*

School-age (4 - 16 years)

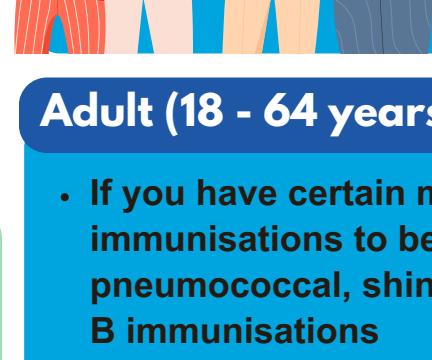

- Flu (nasal spray - offered every year during 'flu season')

GP

School*

Adolescent (12 - 17 years)

- HPV (protecting against certain types of cancers - given at 12-13 years)
- Tetanus / Diphtheria / Polio (given at 14 years)
- MenACWY (given at 14 years)

Adult (18 - 64 years)

- If you have certain medical conditions, you can have immunisations to better protect you, such as: flu, COVID, pneumococcal, shingles, MenB, MenACWY, Hep A or Hep B immunisations
- Please speak with your GP to see which immunisations you are eligible for

Older adults (65+ years)

- Pneumococcal (given at 65+ years)
- Flu (given at 65+ years yearly during 'flu season')
- Shingles (given at 65 or 70-79 years, or at 18+ years if you have certain medical conditions)
- Respiratory syncytial virus ('RSV' given at 75 years)

GP

Recommended immunisations may change if you / your child is older than the recommended age - please check eligibility with your GP practice

*Community & school-aged immunisation service (CSAIS) provides community-clinic and school immunisations: 0300 555 5055
